What are they talking about ? . . . the special features we build into the High Performance SPEEDWAY SERIES TIG Torches.

**SPEED BUMP HANDLE.** Fits the welder's hand like a fine instrument. Rotates 360 degrees and has retaining lip that keeps the cable cover secure to the handle.

**HIGH PERFORMANCE CABLE AND HOSE ASSEMBLIES.** Soft, flexible over braided hoses and power cable provides maximum maneuverability. Larger tinned copper power cable to handle more amps.

**GLOVE SOFT LEATHER CABLE COVER.** Standard on deluxe packages. The soft, durable leather cable cover bundles and protects the hoses and power cable. Will not melt, burn or cut.

**SPEED NUT HOSE CONNECTIONS.** No more troublesome wire tie clamps. No special tools or special hoses. Allows quick and easy repairs.
