Here are comments from actual users of WELDTEC's leather cable covers.

J.B. Van Nuys, CA	"cover is 1 <sup>st</sup> class"
C.B. Houston, TX	"soft leather cover is cool"
S.S. Moorsville, NC	"nice line cover"
B.E. Welling, OK	"the leather sleeve is awesome"
D.H. Phoenix, AZ	"awesome line protector"

What are they talking about? . . . the special WeldTec pigskin glove soft leather cable covers that come standard on Weldtec's Speedway series torches and the deluxe i-Head series torches.

1. **PREMIUM LEATHER.** The pigskin leather is glove soft and supple. It is burn resistant, cut and tear resistant, abrasion resistant and does not pick up grinding burrs from the shop floor.
2. **DOUBLE STITCHED CONSTRUCTION.** Careful workmanship with attention to detail insures long life with double stitched construction using Kevlar thread. The ends have pockets for ty-straps to secure the cover to the torch handle.
3. **NON-CONDUCTIVE ZIPPER OR VELCRO CLOSURE.** The full length zipper or Velcro allows the cover to be installed without removing the torch from the machine. The non-conductive zipper will not conduct "HF" current to ground and is protected from hot metal contact by the overlap flap construction. The Velcro closure is not affected by burn or melts spots and is very secure.
4. **LIGHT WEIGHT.** These covers, unlike the heavier and bulky cowhide covers typically used for cutting torches, are made specifically for TIG torches. They fit neatly and are light weight yet providing excellent protection for the expensive hoses and cables.

Manufacturers of Quality Tungsten Inert Gas Welding Torches and Accessories - Since 1955
